Cyprus Dilemma

HE British government's dilemma over the constitutional future of Cyprus becomes increasingly acute, and the condition can in part be attributed to the government's own curious behaviour,

through Kite-flying "inspired" medium appearing national newspapers can be quite a successful technique for sounding out public feeting on domestic affairs, but, it is it risky procedure when applied to overseas problems which involve several interested parties. Thus is "leaking" the alleged plan for giving Cyprus self-determination within ten to 15 years' time, the British government aroused an immediate hostile reaction in Turkey. whose government in turn "lenked a counter constitutional plan for the island.

The extraordinary situation thus created has been to have the world presented with two "official" plans for the future of Cyprus, neither of which has been officially disclosed through and which are so far apart slowed down, if not stopped, in conception as to make them unacceptable to any farthest in its rebellion against the pressure from its Communist of the parties concerned.

The mystery of the British "plan" has been further complicated by the revelation (not officially denied) that Governor Sir John Harding took it back with him to Cyprus to negotiate. HUNGARY REVOLT THE UKRAINE

London, July 6.

The mushroom cloud of the de-Stalinisation campaign Russia's has spread out menacingly into causing unrest and rebellion of the mind behind the Curtain.

Official and intelligence reports indicate clearly that the move has spread beyond Poland, to other East European nations in bondage. In most East European nations under Soviet control signs of unrest

have been troubling their Communist regimes for some weeks past. But it was the open revolt of the Polish steel workers in Poznan which raised the alarm.

The Communist party leaders have begun to reveal growing anxiety over the ferment caused by the spirit of liberalisation Satellite governments have in the past few days hastened to sound warnings against taking liberties with liberty-a first normal diplomatic channels, hint that the "thow" may be

Hongkong Competition Worrying South Africa

London, July 6. Mr Eric H. Louw, South African Minister of Finance and External Affairs, is to have official talks here next Wednesday on the situation facing the South African textile industry through the importation of cheap goods from Hongkong.

Mr Louw will be accompanied by Dr A. J. Nogval, chairman of the South African Board of Trade and Industries, in talks on the imports with Mr Peter Thorneycroft, President of the British Board of Trade.

"The trouble arises from the fact that Hongkong is a British territory," Mr Louw said today. "Therefore we cannot employ protective tariffs ons we have done against Japanese competition. We are bound by our trado agreement with Britain and we have to discuss the matter to see how we can overcome the difficulty.

"The goods imported from Hongkong are very cheaply produced and our textile industry is acriously affected by this form of competition," he added, Mr Louw, who has been attending the Commonwealth premiers' conference here, left today for talks in Brussels and Paris. He will return to London on Tuesday evening for the textile talks,-

The flance of the bouncy Miss Leigh, who takes the kind of wardrobe on a safari that would be more appropriate to a cruise on a luxury liner is, improbably, Roland Culver. Bing Again

Why is it that such a talented star and happy personality as Bing Crosby alway gets stuck with such vacuous stories. Look at "White Christmas".

I went to "Anything Goes" with high hopes that the Old Groaner might have learned lesson from that one - and I'm and to say he hasn't.

It's a nice enough picture Bing sings and clowns with his usual triendly warmth, Mitzi Gaynor and Jeanmaire dance with vervo and precision and Donald O'Connor, though not quite as light on his feet as he used to be, is still tops among the tappers. But outside of the dancing

A Thriller

"The Killer Is Loose" fairly predictable thriller as far as the plot what retrieves it is the clever direction by Budd Boetticher. In scenes where conversation

takes precidence over action, he sees that they do not become dull and static. There is always movement going on and unlike a stage production, small part players are encouraged to move about naturally and distract the attention fractionally from the main characters.

Watch for a scene in the Police Station where detective Joseph Cotten is interrogating come employees of a bank in which a robbery has just taken place. There are many realistie Bootticher touches here.

TOUGH LUCK FOR MOTHS

Australian Government scientists report a promising attack on housewives' enemy, the clothes moth.

Research Organisation Wool Textile Laboratory they've discovered a way of mothwoollen fabries proofing Immediately after dyeing.

In clothes-moth damage. moths lay eggs on the fabric. Grubs hatch from the eggs and feast on wool, which they've learnt to digest. Moth balls are effective. but malodorous.

Ideal moth-or-grub foiler is a cheap, odouidess, colourinsecticide which added to wool fabrle in or after the dye-bath, stays in the fabric permanently, and is not removable by loundry washing or by

clother-cleaners treatment For the past quartercentury scientists have been seeking this ideal.

At the Commonwealth At present there are effective moth-follers of this type on the market, but they're expensive and must be relded in amounts up to at least one per cent of the weight of wool treated. C.S.IR.O. wool chemists

now find tiny amounts of dieldrin are effective.

Dieldrin is one of the insects have developed reto D.D.T. or sistance hexachlor. C.S.I.R.O. men find that

given a preliminary bath of very weak dickirin solution, worsted goods stay mothproof in spite of one and a half hours' repeated hot soap washings, followed by soak-ing in "dry cleaner" for an hour (fresh solution added every quarter-hour).

Since gammerane (hexachlorbenzene), D.D.T., sillicofluorides, and other well-known insecticides cannot pass this test, C.S.I.R.O. men hope dieldrin's the perfect unswer to molliproofers

But it will have to make 100 per cent kill from the start, or the moth-grubs may learn to resist.

By Aldous Huxley

In 1932 Aldous Huxley's "Brave New World" was the literary sensation of its day. In this, the first of three articles, Mr Huxley examines world population problems in the light of his earlier prophetic fantasy.

WORLD" was a fantasy, but a fantasy about the future and therefore, by implication, a prophecy. good was prophecy? Twenty-five years later, the question begins to admit of an answer. will start with those

aspects of what was then the future, about which the book was silent. The most conspicuous absence from "Brave New World" is any reference to A-bombs, H-bombs or nuclear power plants. It is an absence all the more inexcusable since the Bomb was already, in the early thirties, a subject of drawing-room conversation. At some distant date now find impossible to explain. with atomic power.

Uninvited Guests

THE other great absence is any discussion of a less spectacular but actually much more important subject - population. I had some inkling in 1931 that a problem of population was in the making. Twenty-five years later, with 600 more millions of human beings already pressing upon the world's resources and another hundred and odd thousand uninvited guests sitting down, every single morning, to breakfast, it has manifestly become the problem. Compared with the crease of population, all the shrink into insignificance.

BOWLS WEEK-END

A CRAIGENGOWER VICTORY MAY CHAMPIONSHIP

Says "TOUCHER"

What may be the deciding match of the First Division of the Lawn Bowls League will be played off this afternoon at the Valley between Craigengower Cricket Club and Kowloon Cricket Club.

A 4-1 win for the League-leading Valley club will practically assure them of the Championship. With only four remaining matches to go after this afternoon's game they have only to contend with KBGC, Filipino Club, Taikoo and IRC "Gold",

They have only to average ! four points from these remaining games to bring their aggregate points to 51 which should be ample to earn them the title.

STUMPED-BUT NOT OUT

Says BRUCE DOOLAND

The excitements of the Test match took publicity the other week from one of the most astonishing incidents I have ever seen in cricket. No. I am not referring to the hat trick of my Notts colleague Allan Walker achieved with the first three balls of the Leicestershire innings—although I had never seen that before either. The even more involved incident occurred when Allan Walker bowled the last ball of his third over.

It drew Maurice Hallam right forward, beat him, and flashed through to the wicketkeeper who was standing back. Seeing that he was out of his ground the wicketkeeper hurled the ball at the stumps, shattered them, and there was Hallam "stumped." The square leg umpire immediately gave him out and Hallam Walked

WOUR BIRTHDAY ... By STELLA

SATURDAY, JULY 7

BORN today, you are one of those cautious, "look-before-you-leap" rouls. You have a good head for business and are not likely to reglect the important details which should have your mest careful consideration. You are never one to let someone get ahead of you when it comes to a good bargain. Yet, you have artistic tastes and will be happiest if in some way you are conneeted with the arts and the professions. You enjoy being surrounded by elegance and your home will be beautifully decorated and furnished.

Although you have a great deal of nervous energy, your physical staming is not what it should be. You need to be careful that you have the proper rest, and get a lot of fresh air. Avoid a heavy diet, for eating simple food is one of the easiest methods to keep in good physical trim. You are also inclined to worry tea much over details. If you can't do something constructive about a problem, put it out of your mind. Forget it! Worrying about whi ' you can't do is the worst possible policy.

You wemen are affectionate, sympathetic and make fine teachers and nurses as well as splendid homemakees and understanding parents. You may not wed at an early age, though, for you are highly idealistic about your mate and may take quite a long time making up your mind which admirer you finally should
